

# Can you make a snail?

1. Coloured craft paper
2. Paper strips
3. Scissors
4. Pencil
5. Craft glue
6. Marker pen

## Instructions:

**Step -1:** Select coloured craft paper for the snail and trace the template patterns on the selected papers. (Separate sheet in pack). Use scissors to cut out the traced patterns.

**Step -2:** Select different coloured paper/card, cut into strips. Coil each strip. Make as many loose coil shapes as required.

**Step - 3:** Start to glue the loose coil shapes on the round cut out one by one. Start gluing the loose coils from the outer edge (the border of the round cut out) of the round cut out.

**Step - 4:** Keep gluing the loose coil shapes on the round cut out until it is filled. You can add tiny coils to fill the gaps between the loose coils if you want.

**Step - 6:** Now take the body cut out of the snail and stick the 2 eye cut outs on their places on the body cut out. Make sure to draw the eyeballs on the 2 eye cut outs; use black sharpie to draw them. This is the shell of the snail.

**Step - 7:** Now stick the quilled round piece on the body of the snail. Allow the glue to dry and meanwhile make another one!
